DETAILED ACTION

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Providing nanotubes that are covalently bonded to an implantable electrode as claimed is not taught nor suggested by the prior art of record and upon further consideration does not appear to be an obvious modification of the prior art to strengthen the electrode.

Applicant has amended claims 1, 11, 14, 20 and 25 to clearly state the covalent bonding between the nanotubes and the coating to define the low polarization function of the nanotubes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brabec et al (US 2005/0203604) disclose an electrode lead comprising carbon nanotube material.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (571) 272-4952.
